

Brief Statement Explaining the Amendment under Article 19 (1)

The added claim 14 is fully supported by the description in BEST MODE FOR CARRYING OUT THE INVENTION of the original Description in Japanese (in pages 7 to 10) and adds no new matter.

The arrangement of this claim allows the driving motor to be disposed at an intermediate position in the right and left direction of the leg-rest and the footrest, whereby the space between the pair of right and left insertion recesses is effectively utilized, thereby allowing reduction of entire size of the apparatus.
